# PRODUCTS & SERVICES

Custom solutions catered to your individual needs.

Contact us today to see how we can help you.

## PLC and Electrical Troubleshooting

We provide emergency service to companies in need of technical support of their control systems.

## Electrical Control Panel Design & Manufacturing

We can design and build a control panel for your needs or build a panel to the specifications of your design.

## SCADA and HMI Design

Whether you need a simple machine interface to replace outdated controls or a complete SCADA system, we can offer you the solution that you require.

## Control Instrumentation

We work with a variety of control instruments from temperature controllers, pressure sensors and flow meters to name a few.

## Electrical Drawing Digital Conversion

Old drawings wear out, get torn or ripped, or are changed as necessary. We provide the service of re-writing your prints in digital format.

## Remote Support

We offer remote support for systems that we install to provide support when our team is not in your area of operation. It will ease your mind knowing that we can support you from anywhere and anytime.
